

What's New in iPayStatements

We are pleased to bring you iPayStatements. Based on your feedback, and independent usability research, ADP continues to provide iPayStatements in our redesigned user interface.

Now you can access your adjusted items in the following iPayStatements pages:

- Your Pay Statements Summary
- Your Pay Adjustments Summary
- Your Pay Adjustments History

New Navigational Features

New navigational tools were introduced into iPayStatements in release 4.0.

The screenshot shows the ADP iPayStatements interface. At the top right, there is a 'Logout' button with a red 'X' icon. The main header includes the ADP logo and the text 'iPayStatements'. Below the header, there are three navigation tabs: 'Pay Statements' (selected), 'W-2', and '1099'. A green arrow points to these tabs with the text 'Navigation is simpler'. Below the tabs, a message states: 'Your most recent statements are shown below. Click a date to view the statement details.' A table of pay statements is displayed with columns for 'Pay Date', 'Check No.', 'Gross', and 'Net 1'. A red box highlights the 'Pay Date' column, and a red arrow points to it with the text 'Finding pay statements is easier'. Below the table, there is a filter for 'Show all pay statements for:' with options for '2005', '2004', and '2003'. A blue arrow points to a 'Resource Center' sidebar on the right, which contains sections for 'Information Center' (with links for 'Need Help?' and 'See What's New On This Site?'), 'Things You Can Do' (with links for 'Change Your Password', 'Go Paperless', 'Change Your Notification Options', 'Edit Your E-mail Address', 'Change Your Security Questions', and 'Manage Your 401(k) Account'), and 'Financial Tools' (with links for 'Salary Paycheck Calculator', 'Hourly Paycheck Calculator', 'Gross Paycheck Calculator', '401(k) Calculator', '403(b) Calculator', 'Employee Stock Option Calculator', and 'W-4 Assistant'). A blue arrow points to this sidebar with the text 'Everything you can do is easily available'.

Get help when you need it

Just in case you have any questions, iPayStatements displays common questions to help you on each page.
